

EXAMEN D'ANGLAIS / SESSION 02 / MIAGE L2- 2023-2024

2HOURS

DATE _____

NAME _____

MARK: _____

NB : Sauf avis contraire de l'administration, toutes les réponses devront être portées sur la feuille ci- présente.

PART I: READING (50 pts)

Read and do the activities that follow. Please be clear and concise. Explain your answers; do not copy blindly the text.

Scientists study the world and learn about how it works. As they study the world, the scientists use a process called the scientific method. They ask important questions and search for the answers. Sometimes they make amazing discoveries! There are times when a scientist is unable to answer his own question. If he has taken good notes, another scientist may come along later and use his notes to find the answer. Every year there is new knowledge. The scientific method is a step-by-step process. You can use it to conduct an experiment. You start by making observations about something that interests you. Based on your observations, you make a hypothesis. A hypothesis is a smart guess you make by using what you know. You guess what you think could happen. Now you are ready to begin your experiment. During your experiment you should take notes. These notes are your experiment data. You constantly make observations during this time. You may discover things that make you to revise your experiment. Eventually, you conclude your experiment. Next, you begin to look over your notes. You decide what you found out in your experiment. You make a final statement about whether or not your hypothesis was correct. You use reasons and evidence to support your statement. Using the scientific method can be challenging. However, it can also be rewarding. All the steps are organized in a process. When you provide observations and data as evidence to support your conclusion, your ideas are more likely to be accepted.

1) Give the text a title. (5pts)

2) When you find something that interests you, how do you make a hypothesis? (5pts)

3) Why it is important to take good notes when you are conducting an experiment? (5pts)

4) Why is the scientific method constraining? (5pts)

5) What is the last step in the scientific method? (5pts)

6) Name one thing you might like to investigate this year for a science project. Explain your idea or project. (25pts)

PART III WRITING (50 pts)

"Artificial Intelligence (AI) is one of the most transformative technology evolutions of our times." Comment on the assertion. Please consider the **writing steps/ Organization** discussed in class. Do not please exceed the space provided.
